

2025
ESG PORTFOLIO

OUR FUND

WHALES & PARTNER WAS BORN FROM THE AMBITION OF FIVE NEOMA BUSINESS SCHOOL ALUMNI TO RECONCILE FINANCIAL PERFORMANCE WITH PURPOSE. AFTER GAINING EXPERIENCE IN INVESTMENT FUNDS AND FINANCIAL MARKETS, THEY CHOSE TO JOIN FORCES AROUND A SIMPLE CONVICTION: THE FUTURE IS BUILT ON SOLID FOUNDATIONS.

OUR PHILOSOPHY IS BASED ON A STRONG IDEA: INVESTING IN WHAT SHAPES THE WORLD OF TOMORROW. WE FOCUS ON FRENCH COMPANIES, PARTICULARLY THOSE LISTED ON THE CAC 40, THAT DEVELOP INFRASTRUCTURE, CREATE SUSTAINABLE MOBILITY SOLUTIONS, AND DESIGN MORE RESPONSIBLE BUILDINGS.

BY SUPPORTING THESE PLAYERS, WE CREATE A VIRTUOUS CIRCLE: DELIVERING ROBUST AND LASTING PERFORMANCE TO OUR INVESTORS WHILE CONTRIBUTING TO PROGRESS THAT BENEFITS SOCIETY AS A WHOLE. FOR US, INVESTING IS NOT JUST ABOUT SEEKING RETURNS. IT IS ABOUT ACTIVELY PARTICIPATING IN BUILDING A MORE SUSTAINABLE, RESILIENT, AND HUMAN FUTURE.

Quantitative Analysis :

In our quantitative approach, we carried out a progressive selection of CAC 40 companies in order to identify those most directly contributing to SDG 9 (Industry, Innovation and Infrastructure) and SDG 11 (Sustainable Cities and Communities).

After an initial qualitative screening, we used an Excel filter based on ESG scores (Environmental, Social and Governance). Two main indicators were considered:
the Average, reflecting each company's overall ESG performance;

the Evolution, showing the progression of this score over time.
This process enabled us to reduce the original list of 40 companies to a smaller, more relevant group. The selected firms are:

- Thales SA,
- Schneider Electric SE,
- Capgemini SE,
- Airbus SE,
- Saint-Gobain, Stellantis NV,
- Safran SA,
- Dassault Systèmes SE,
- Engie, Renault SA,
- Veolia Environnement,
- LVMH,
- Société Générale
- SA Bouygues SA.

Some companies show a strong positive evolution, such as Stellantis (+203.45%), Société Générale (+158.82%) and LVMH (+192.31%), reflecting significant improvements in their ESG performance. Others, such as Thales (0.935 average) and Schneider Electric (0.86 average), stand out with high ESG scores, demonstrating advanced maturity in sustainability practices.

Qualitative Analysis

Our relevant research is based on three characteristics : performance, Capex and the project coherence focused on sustainable industry, resilient infrastructure, resilient mobility and eco-friendly investments.

WHALES PORTFOLIO:

-Bouygues: The SEQUANA tower is a highly innovative building which consumes less 50% than other office towers. Certified High Environmental Quality, this tower shows the Bouygues' strategy: shaping

-Renault: How can we not mention Renault. The group is investing heavily in electric mobility and also in charging stations. Renault is a major actor of decarbonisation.

`-Veolia Environment: Veolia innovates in the sustainable management of essential infrastructure, especially water, sanitation, and energy networks, developing technological solutions to enhance performance and resilience.

Safran: One example of Safran's initiative supporting SDG 9 is their development of hybrid-electric propulsion technologies for aircraft. This project seeks to significantly reduce carbon emissions from aviation by combining traditional jet engines with electric power systems, thereby advancing sustainable innovation in the aerospace industry and contributing to cleaner, more efficient infrastructure for air transport

Schneider electric: Schneider Electric plans to strengthen its commitment to the circular economy in France by developing a comprehensive range of refurbished electrical equipment by 2025. This project involves transforming several industrial sites to collect, repair, and reintroduce end-of-life or unused equipment to the market, while providing the same guarantees as new products. The goal is to drastically reduce the carbon footprint linked to manufacturing, limit the use of raw materials, and offer customers more sustainable and affordable solutions. This initiative reflects Schneider Electric's determination to embed its activities in a sustainable model and accelerate the transition toward a circular economy.

	Average	Evol	% of CAPEX
CAPGEMINI SE	0,839	0,00%	53,00%
COMPAGNIE DE SAINT	0,759	14,08%	34,00%
DASSAULT SYSTEMES	0,633	18,33%	74,00%
ENGIE	0,586	15,69%	68,00%
RENAULT SA	0,54	65,71%	100,00%
SAFRAN SA	0,647	33,96%	78,00%
SCHNEIDER ELECTRIC	0,86	0,00%	71,00%
STELLANTIS NV	0,71	203,45%	97,00%
THALES SA	0,935	0,00%	34,00%
VEOLIA ENVIRONNE	0,345	-	65,40%

ESG and Capital Allocation
Our selection process is built on three core indicators to ensure investments are both high-performing and aligned with SDGs 9 and 11.

1. Environmental ESG Average (0 to 1)
This metric assesses the company's current environmental performance and maturity. A high score (e.g., Thales SA 0.935, Schneider Electric 0.86) demonstrates advanced ESG standards and robust risk management, providing essential resilience to our portfolio.

2. ESG Evolution (2020 – 2025)
This percentage measures the company's pace of transition. Significant growth (e.g., Stellantis NV +203.45%) validates our strategy of investing in active transformers. These companies are rapidly accelerating their sustainable efforts, aligning perfectly with our goal to build a future without emissions.

3. % of CAPEX Aligned
This is the most critical metric for our theme. It shows the share of Capital Expenditure (CAPEX) dedicated to sustainable infrastructure and solutions (based on Taxonomy alignment). A high percentage (e.g., Renault SA 100%) proves the company is deploying capital to be the concrete engine of the transition we aim to fund.

WE SIMULATED THE PORTFOLIO'S PERFORMANCE BY CREATING AN INDEX BASED ON THE RETURNS OF THE 10 COMPANIES WE SELECTED, WITH AN EQUAL ALLOCATION OF 10% TO EACH. FROM JANUARY 2020 TO DECEMBER 2024, OUR PORTFOLIO WOULD HAVE ACHIEVED A 100% PERFORMANCE OVER 4 YEARS. OF COURSE, PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS
